Acknowledgments

Nuclear Security Women (NSW) is grateful for the support of leadership at the National Nuclear Security Administration (NNSA), particularly Allison Johnston, associate assistant deputy administrator of the Office of Material Management and Minimization (NA-23), NNSA.

This issue would not have been possible without the vision and leadership of the NSW program manager, Taylor Hart-McGonigle, foreign affairs specialist, Office of International Nuclear Security (NA-21), NNSA. Thanks are also due to the NSW laboratory lead, Lindsey Gehrig, Pacific Northwest National Laboratory; her dedication to this work has been essential to its success.

Many NSW team members contributed to this special issue. Kathleen A. Doty, Pacific Northwest National Laboratory, served as the guest editor of the IJNS–NSW special issue. Other NSW team members from around the US national laboratory complex who made valuable contributions during the process include Jessica Burniske (Pacific Northwest National Laboratory), Malinda Devaney (Pacific Northwest National Laboratory), Madalina Man (Pacific Northwest National Laboratory), Olga Martin (Los Alamos National Laboratory), Anne McQuaid (Pacific Northwest National Laboratory), Matthew Moliterno (Sandia National Laboratories), Miles Porter (Pacific Northwest National Laboratory), Erin Rogers (Oak Ridge National Laboratory), and Cristina Siserman-Gray (Pacific Northwest National Laboratory).

NSW would particularly like to thank the staff at IJNS. NSW appreciates the opportunity to collaborate with them on this important work.

IJNS would first like to thank NSW for choosing to embark on this project. We were thrilled to have this opportunity, and we have greatly enjoyed working with you. We certainly hope to work on more projects together in the future.

IJNS would also like to thank all the volunteer technical editors for their technical editing assistance. This project would not have been possible without their help. Additionally, IJNS thanks Michael Sutherlin, the IJNS Davis Editor through the University of Tennessee, Knoxville's Department of English at the time of working on this special issue, for his assistance with coordinating editors and providing manuscript support.
