Gibbs Award for Excellence in Systematic Ichthyology

Nominations are invited for the American Society of Ichthyologists and Herpetologists (ASIH) Robert H. Gibbs, Jr. Memorial Award for Excellence in Systematic Ichthyology.

The Prize is awarded for an outstanding body of published work in systematic ichthyology to a citizen of a Western Hemisphere nation who has not been a recipient of the award. The award is offered annually and consists of an appropriate plaque and a cash award (approximately \$7500). The award recipient is announced at the annual meeting of the American Society of Ichthyologists and Herpetologists. The award for 2000 was presented to Dr. James C. Tyler, Senior Scientist, National Museum of Natural History, Smithsonian Institution, for his outstanding contributions on plectognath fishes, as well as his papers on several other groups of fishes, both recent and fossil.

Nominations may be made by any ichthyologist, including self-nominations, and should include the nominee's curriculum vitae, details of the nominee's specific contributions and their impacts on systematic ichthyology. Nominations should be submitted by 1 March 2001 in order for the nominee to be eligible for that year's award. Nominations will be effective for three award periods (2001-2003). Four copies of each nomination should be sent to Dr. Maureen A. Donnelly, Department of Biological Sciences, Florida International University, 3000 NE 151st St., North Miami, FL 33181-3000.
